how dry ice is made cryocarb Apr 10 2021 dry ice is made by liquefying carbon dioxide and injecting it
into a holding tank where it s frozen at a temperature of 109 f and compressed into solid ice depending
on whether it s created in a pelletizer or a block press dry ice can then be made into pellets or large
blocks unlike regular ice dry ice doesn t melt into a liquid as it warms up instead it converts directly
back
