Source Data Used to Produce the Forest Plot Figures *Tropical Forest Ecosystem Responses to Increasing Nutrient Availability* Oct 25 2019 Deforestation and land use change have led to a strong reduction of tropical forest cover during the last decades. Climate change will amplify the pressure to the remaining refuges in the next years. In addition, tropical regions are facing increasing atmospheric inputs of nutrients, which

will have unknown consequences for the structure and functioning of these systems, no matter if they are within protected areas or not. Even remote areas are expected to receive rising amounts of nutrients. The effects of higher rates of atmospheric nutrient deposition on the biological diversity and ecosystem functioning of tropical ecosystems are poorly understood and our knowledge of nutrient fluxes and nutrient limitation in tropical forest ecosystems is still limited. Yet, it will be of paramount importance to know the effects of increased nutrient availability to

conserve these ecosystems with their biological and functional diversity. During the last years, research efforts have more and more focused on the understanding of the role of nutrients in tropical ecosystems and several coordinated projects have been established that study the effects of experimental nutrient addition. This Research Topic combines results from experiments and from observational studies with the aim to review and conclude on our current knowledge on the role of additional nutrients in ecosystems.

## **Government Finance Statistics Yearbook, 2012**

Aug 23 2019 The demand for high quality detailed public finance statistics covering a globally representative sample of countries has increased dramatically during the recent financial crisis. Due to the complexity of public finance statistics, however, such data tend to be either available in oversimplified high level aggregates and lacking in methodological transparency, or, available with a great level of detail and a unified methodological approach yet overly complicated to understand. The IMF's Government Finance Statistics

Yearbook shows fiscal data of around 140 countries following the Government Finance Statistics Manual 2001 framework. The associated database includes data series covering over an almost 40 year period. The IMF's Statistics Department embarked on several initiatives to improve its accessibility.

marine and oceanic processes. From the micro-scale, like coastal processes, to macro-scale, the oceans, the seas and the marine life, play the main role to maintain the earth equilibrium, both from a physical and a chemical point of view. Since ancient times, the world's oceans discovery has brought to humanity development and wealth of knowledge, the metaphors of Ulysses and Jason, represent the cultural growth gained through the explorations and discoveries. Gynaecological practice has changed fundamentally in the last three decades and a large proportion of major pelvic operations has been replaced by minimally invasive approaches. This book will cover minimally invasive approaches in all aspects of gynaecology including general gynaecology, oncology, urogynaecology and reproductive medicine. The chapters are written at a level appropriate for trainees/residents and general gynaecology specialists but enough details and additional resources will be

who require further information. Specific aim of the book is to provide direct to the point surgical pearls which can be adapted to the daily practice instantly by the target audience. The book includes chapters on relevant surgical anatomy, principles of MIS, management of camera systems, video/image editing, initiating a successful MIS practice, improving efficiency of current MIS program, how to develop successful teaching techniques in academic setting, avoiding & managing MIS related surgical complications and preoperative/postoperative care before covering MIS for

individual conditions including intensive care managements. Chapters are written by world renown authorities. ACOG guideline recently published a statement recommending vaginal hysterectomy and endoscopic hysterectomy should be considered as a first step of surgical choice. Current practice has been shifting from open cases to laparoscopic/robotic assisted cases while vaginal cases stays steady. This shift has created an urge among gynaecologists to learn, improve or adapt laparoscopic/robotic techniques in their practice.

Jeder Gynäkologe und Onkologe muss daher in Bezug auf Vorsorge, Diagnostik, Behandlung und Betreuung von Krebspatientinnen kompetent sein. Eine der größten Herausforderungen für Ärzte in der Facharzt-Weiterbildung ist jedoch der Umgang mit krebskranken Patientinnen. Das Buch präsentiert verständlich und praxisnah Erfahrungen anderer Kollegen, Berichte über vergleichbare Fälle und berücksichtigt auch die eigene Bewältigung des Berufsalltags.
