Teaching Writing as Journey, Not Destination Mar 25 2022 American author Kurt Vonnegut has famously declared that writing is unteachable, yet formal education persists in that task. Teaching Writing as Journey, Not Destination is the culmination of P.L. Thomas's experiences as both a writer and a teacher of writing reaching into the fourth decade of struggling with both. This volume collects essays that examine the enduring and contemporary questions facing writing teachers, including grammar instruction, authentic practices in high-stakes environments, student choice, citation and plagiarism, the five-paragraph essay, grading, and the intersections of being a writer and teaching writing. Thomas offers concrete classroom experiences drawn from teaching high school ELA, first-year composition, and a wide range of undergraduate and graduate courses. Ultimately, however, the essays are a reflection of Thomas's journey and a concession to both writing and teaching writing as journeys without ultimate destinations.

College Writing and Beyond Jan 11 2021 Composition research consistently demonstrates that the social context of writing determines the majority of conventions any writer must observe. Still, most universities organize the required first-year composition course as if there were an intuitive set of general writing "skills" usable across academic and work-world settings. In College Writing and Beyond: A New Framework for University Writing Instruction, Anne Beaufort reports on a longitudinal study comparing one student's experience in FYC, in history, in engineering, and in his post-college writing. Her data illuminate the struggle of college students to transfer what they learn about "general writing" from one context to another. Her findings suggest ultimately not that we must abolish FYC, but that we must go beyond even genre theory in reconceiving it. Accordingly, Beaufort would argue that the FYC course should abandon its hope to teach a sort of general academic discourse, and instead should systematically teach strategies of responding to contextual elements that impinge on the writing situation. Her data urge attention to issues of learning transfer, and to developmentally sound linkages in writing instruction within and across disciplines. Beaufort advocates special attention to discourse community theory, for its power to help students perceive and understand the context of writing.

Yagelski's WRITING: TEN CORE CONCEPTS is based on ten fundamental lessons -- the core concepts -- that students must learn to become effective writers. The text introduces students to the key rhetorical moves of three essential aims of writing (analysis, argument, and narrative) and then offers applied assignment chapters that use the ten core concepts to guide students' thinking and writing. Emphasizing writing as an interaction between a writer and a reader, WRITING: TEN CORE CONCEPTS offers students a way to participate in the important conversations that shape our lives. The second edition includes 21 new readings, new strategies for academic reading, a new section on summary-response essays, updated guidance on finding digital resources and on MLA documentation, and more.
