Multimedia/Hypermedia in Open Distributed Environments Apr 10 2021 Over the last few years, multimedia hardware and applications have become widely available in the personal computer and workstation environments, and multimedia is rapidly becoming an integral part of stand-alone, single-user systems. In contrast, the problems encountered when moving to open, distributed environments are only just beginning to be identified. Examples are the transmission of dynamic data (video, sound) over large distances and cooperative work. Following on from two successful workshops on multimedia, EG-MM '94 concentrates on topics related to multimedia/hypermedia in open, distributed environments. The goal of this symposium was not only to give a comprehensive overview of the current state of research, development, and standardisation in the field, but also to provide an opportunity for live demonstrations to experience directly the presented results. The symposium program consists of two invited keynote speeches, eight technical sessions, one tutorial, and one demonstration session. A workshop following immediately after the symposium provides an opportunity for in-depth discussions of open problems among experts. It is intended to fill a gap often experienced at larger meetings and conferences: the lack of time to discuss in detail issues raised during the event, such as the characteristics of different approaches to a certain problem. It is intended that the results of the workshop be published as a Eurographics Technical Report.

The Routledge Handbook of Audio Description Jul 25 2022 This Handbook provides a comprehensive overview of the expanding field of audio description, the practice of rendering the visual elements of a multimodal product such as a film, painting, or live performance in the spoken mode, for the benefit principally of the blind and visually impaired community. This volume brings together scholars, researchers, practitioners and service providers, such as broadcasters from all over the world, to cover as thoroughly as possible all the theoretical and practical aspects of this discipline. In 38 chapters, the expert authors chart how the discipline has become established both as an important professional service and as a valid academic subject, how it has evolved and how it has come to play such an important role in media accessibility. From the early history of the subject through to the challenges represented by ever-changing technology, the Handbook covers the approaches and methodologies adopted to analyse the "multimodal" text in the constant search for the optimum selection of the elements to describe. This is the essential guide and companion for advanced students, researchers and audio description professionals within the more general spheres of translation studies and media accessibility.

Mafia casino has been closed, and over a billion dollars of mob money has been confiscated. Sam Giancana and other Mafia bigwigs are extremely unhappy with Fidel. They are looking for a way to get even. So are the Americans, many of whom have been forced to flee to safety. Castro has already executed seven hundred Cuban citizens who dared to object to his murderous regime. There are no rights in Cuba other than those granted by Fidel Castro and his henchmen. Murder and mayhem are the order of the day. The burning question is, what can be done to stop Castro? On March 17th, President Eisenhower gives his permission for the C.I.A.'s Allen Dulles and Richard Bissell to develop a small, covert, anti-Castro operation. A thousand Cuban refugees will be recruited and trained as guerrilla fighters and saboteurs. When they're ready, they'll be infiltrated back into Cuba, where they'll begin a series of raids designed to upset, and eventually overthrow, the Castro regime. In the pages of *The Castro Conspiracy* we'll meet the U.S. Marine and Special Forces personnel who train those men. We'll visit them in their Central American mountain and jungle training camps. Then we'll watch as the 1960 Presidential Election puts a reluctant commander-in-chief in the White House, and see the entire, carefully orchestrated, covert operation fall apart. We'll attend dozens of secret meetings conducted by the CIA, FBI, and the CFR. At those meetings we'll finally discover why Operation Trinidad, a small, easily controlled and plausible incursion, a plan that was almost certain to succeed, was turned into the over-zealous, overly ambitious, and impossible to control fiasco that the Bay of Pigs Invasion eventually became. We'll meet the Kennedy family and the Castros, along with the deadly Mafia hitmen who are recruited to kill Castro. Washington insiders and Hollywood stars will be on display. Along the way we'll watch men who willingly risk their lives to achieve success, and women who willingly use their wiles to keep them from gaining that success. We'll get to know Jack Kennedy, a man who desperately wants the Cuban Invasion to succeed, and

John F. Kennedy, a president who desperately can't afford to allow it to. And we'll be present when he cancels American air support the decision that spelled doom for the invasion and every Cuba Freedom Fighter. We'll spend three frightening days in the middle of the Bay of Pigs Invasion, and eighteen frustrating months in its aftermath fighting and dying on the beaches running and hiding in the swamps sweating and suffering in the prisons. And wondering, always wondering, why the Americanos deserted us? We'll
