Economics of Regulation and Antitrust May 23 2022 A substantially revised and updated new edition of the leading text on business and government, with new material reflecting recent theoretical and methodological advances; includes further coverage of the Microsoft antitrust case, the deregulation of telecommunications and electric power, and new environmental regulations. This new edition of the leading text on business and government focuses on the insights economic reasoning can provide in analyzing regulatory and antitrust issues. Departing from the traditional emphasis on institutions, Economics of Regulation and Antitrust asks how economic theory and empirical analyses can illuminate the character of market operation and the role for government action and brings new developments in theory and empirical methodology to bear on these questions. The fourth edition has been substantially revised and updated throughout, with new material added and extended discussion of many topics. Part I, on antitrust, has been given a major revision to reflect advances in economic theory and recent antitrust cases, including the case against Microsoft and the Supreme Court's Kodak decision. Part II, on economic regulation, updates its treatment of the restructuring and deregulation of the telecommunications and electric power industries, and includes an analysis of what went wrong in the California energy market in 2000 and 2001. Part III, on social regulation, now includes increased discussion of risk-risk analysis and extensive changes to its discussion of environmental regulation. The many case studies included provide students not only pertinent insights for today but also the economic tools to analyze the implications of regulations and antitrust policies in the future. The book is suitable for use in a wide range of courses in business, law, and public policy, for undergraduates as well as at the graduate level. The structure of the book allows instructors to combine the chapters in various ways according to their needs. Presentation of more advanced material is self-contained. Each chapter concludes with questions and problems.

The Economic and Social Regulation of Public Utilities Sep 15 2021 Examines the complex regulation and deregulation of energy, communications, transportation and water utilities across Western Europe, the United States, Australia, Brazil, China and India. In each case, attention is drawn to the changing roles of the state, the market and firms in the regulation, organization and delivery of utility services.

Social Regulation in the WTO Mar 09 2021 'Recourse to restrictions of international trade for the promotion of non-economic goals is at the heart of international trade regulation. This book offers a fresh, broad, but equally detailed analysis of such restrictions. It places WTO law in the broader framework of public international law and explores new ways and means as to how tensions and conflict in the pursuit of non-economic policy goals should be addressed. It is essential reading for all seeking answers beyond the existing framework of WTO law and policies.' Thomas Cottier, World Trade Institute, University of Bern, Switzerland and Institute of European and International Economic Law 'This book presents a thoughtful and very readable analysis of "social trade regulation", that is, the use of border measures for non-trade purposes. The study examines how such measures are regarded in international law and in the more specialized law of the World Trade Organization. After she concludes that such unilateral measures may often be illegal under trade law, Professor Schefer's original contribution to the debate is to unpack that unlawful status into the categories of "law-disabling", "law-supporting", and "law-creating" trade regulation. Through a careful exposition of these concepts, the book shows ways in which social trade regulation can improve the progress of the international community.' Steve Charnovitz, The George Washington University, US This original and authoritative book analyzes how the WTO's restrictions on the use of trade measures for social goals affects the development of the law of the international community. The author examines international law on the use of trade measures to promote non-trade values including human health, environmental protection, and cultural diversity in order to determine whether the WTO decisions in these areas promote the development of the international legal system in a way that benefits the individual. Including an analysis of the most important 'trade-&' cases handed down by the WTO's Appellate Body, the book stimulates creative consideration of the extent to which the international trading system's prohibition on the use of trade measures may stifle progress on legal norms that would foster an international community. Krista Nadakavukaren Schefer suggests using the law of equity to fully take into account both the trade and the social issues at stake in any particular case. With its thorough analysis of WTO trade and decisions, this path-breaking book will be a stimulating read for scholars and students of international law, international economic law and international relations.

Social Regulation in Markets for Consumer Goods and Services Nov 17 2021 This study analyzes the economics of rational policy formulation and the economic theory of social regulation in markets for consumer goods and services, summarizes the legal basis of social regulation in Canada, summarizes and critically reviews social regulation in Ontario, and provides our policy recommendations.

Constitutionalism, Multilevel Trade Governance and Social Regulation Aug 14 2021 This is a book about the ever more complex legal networks of transnational economic governance structures and their legitimacy problems. It takes up the challenge of the editors' earlier pioneering works which have called for more cross-sectoral and interdisciplinary analyses by scholars of international law, European and international economic law, private international law, international relations theory and social philosophy to examine the interdependences of multilevel governance in transnational economic, social, environmental and legal relations. Two complementary strands of theorising are expounded. One argues that globalisation and the universal recognition of human rights are transforming the intergovernmental "society of states" into a cosmopolitan community of citizens which requires more effective constitutional safeguards for protecting human rights and consumer welfare in the national and international governance and legal regulation of international trade. The second emphasises the dependence of the functioning of international markets and liberal trade on governance arrangements which respond credibly to safety and environmental concerns of consumers, traders, political and non-governmental actors. Enquiries into the generation of international standards and empirical analyses of legalization and judicialisation practices form part of this agenda. The perspectives and conclusions of the more than 20 contributors from Europe and North-America cannot be uniform. But they converge in their search for a constitutional architecture which limits, empowers and legitimises multilevel trade governance, as well as in their common premise that respect for human rights, private and democratic self-government and social justice require more transparent, participatory and deliberative forms of transnational "cosmopolitan democracy".

Regulatory Transformations Apr 10 2021 The issue of whether transnational risk can be regulated through a social sphere goes to the heart of what John Ruggie has described as 'embedded liberalism': how capitalist countries have reconciled markets with the social community that markets require to survive and thrive. This collection, located in the wider debates about global capitalism and its regulation, tackles the challenge of finding a way forward for regulation. It rejects the old divisions of state and market, citizens and consumers, social movements and transnational corporations, as well as 'economic' and 'social' regulation. Instead this rich, multidisciplinary collection engages with a critical theme—the idea of harnessing the regulatory capacity of a social sphere by recognising the embeddedness of economic transactions within a social and political landscape. This collection therefore explores how social norms, practices, actors and institutions frame economic transactions, and thereby regulate risks generated by and for business, state and citizens. A key strength of this book is its integration of three distinct areas of scholarship: Karl Polanyi's economic sociology, regulation studies and socio-legal studies of transnational hazards. The collection is distinct in that it links the study of specific transnational risk regulatory regimes back to a social-theoretical discussion about economy-society interactions, informed by Polanyi's work. Each of the chapters addresses the way in which economics, as well as economic and social regulation, can never be understood separately from the social, particularly in the transnational context. Endorsement 'This thought-provoking collection asks the most critical question of our time - how to civilise markets through social accountability and political action. The climate and financial crises we face show how crucial this challenge is. Lange, Haines and Thomas have put together a series of fruitful case studies of the possibilities for embedding economic relationships in social relationships by a series of top-class researchers within their own illuminating and sensitive framing of the issue'. Professor Christine Parker, Professor of Regulatory Studies at Monash University.

Social protection after the crisis Jun 19 2019 UK austerity policies include anti-regulatory pressures to 'free up' private capital to produce wealth, employment and tax revenues. This topical book by a recognised scholar on the regulation of corporate crime and social harm considers the economic, political and social consequences of the economic crisis, the nature of social protection and the dynamics of the current crisis of regulation. It is unique in documenting how economic and social welfare are inconsistent with corporate freedom, and in an empirical and theoretical analysis of regulatory reform within the context of wide-scale social change. Based on empirical research and with a focus on environmental, food, and workplace safety, it considers how we reached the current crisis of anti-regulation and how we might overcome it. The author proposes radically rethinking 'regulation' to address conceptual, policy and practical issues, making the book essential reading for those interested in this important topic.

Regulation May 31 2020 Federal regulations affect nearly every area of our lives and interest in them is increasing. However, many people have no idea how regulations are developed or how they have an impact on our lives. Regulation: A Primer by Susan Dudley and Jerry Brito provides an accessible overview of regulatory theory, analysis, and practice. The Primer examines the constitutional underpinnings of federal regulation and discusses who writes and enforces regulation and how they do it. Published by the Mercatus Center at George Mason University, it also provides insights into the different varieties of regulation and how to analyze whether a regulatory proposal makes citizens better or worse off. Each chapter discusses key aspects of regulation and provides further readings for those interested in exploring these topics in more detail.

Regulation and Social Control of Incivilities Oct 24 2019 The increasing trend and prevalence of incivilities-targeting punitive regulatory measures across Europe raises important issues regarding the legitimacy, effectiveness and impact of such formal social control. Regulation and Social Control of Incivilities addresses the pertinent issues of current punitive regulation and the social control of incivilities, their trends, criminological explanations, political, spatial, cultural, representational and policing dimensions as well as the underlying behaviour it targets. Part I explores issues surrounding the regulation of incivilities, drawing examples from several European countries including Spain, Italy, Great Britain, Belgium, Slovenia and Hungary. It inspects the legal form and content of the prohibition of incivilities and the social factors that can help explain it, as well as the effectiveness and societal impact of various anti-nuisance measures. Part II focuses on social control and the representation of incivilities, including the construction and control of public nuisance in Belgium, the spatial and cultural aspects of incivilities and of law enforcement against them, the media representations of incivilities in the British and Flemish press, and the intersections between migration and control of incivilities when policing in the Netherlands. This book brings together international scholars to examine the ways in which understudied European countries approach the issue of anti-social behaviour. This multidisciplinary text will be of interest to students, scholars and policymakers concerned with issues of social control, incivilities and criminalisation.

Signals from the Hill Feb 26 2020 Does Congress do a good job of overseeing the work of the important legislative agencies--the EPA, FDA, OSHA, and others--that it has established to protect the public from some of the risks of modern

technology? Combining analysis and anecdote, Christopher H. Foreman, Jr. looks into the oversight tools available to Congress, the variety of interest groups involved, the kinds of issues that arise between agencies and congressional committees, and the personal networks that affect relations between them; and he suggests what Congress can and should do to improve the process of social regulation. "Foreman adds substantially to our understanding of the role played by oversight. . . . A solid contribution toward understanding the nature of day-to-day congressional oversight."--Burdett Loomis, *Journal of Politics* "This book] is presented clearly, free from jargon, whether academic or governmental. . . . A solid discussion of oversight."--Jan P. Vermeer, *Perspective* "This is a thoughtful, effectively organized, and well-written book. Those concerned with legislative oversight will find it highly useful."--Morris S. Ogul, *University of Pittsburgh Winner of the 1989 D. B. Hardeman Prize given by the Lyndon Baines Johnson Library for the best book on Congress in the twentieth century*

Changing the Subject Apr 22 2022 "Changing the Subject" is a classic critique of traditional psychology in which the foundations of critical and feminist psychology are laid down. Pioneering and foundational, it is still "the" groundbreaking text crucial to furthering the new psychology in both teaching and research. Now reissued with a new foreword describing the changes which have taken place in the discipline over the last few years, this book will continue to have significant impact on thinking about psychology and social theory.

Universal Service in WTO and EU law Jun 24 2022 This book is a systematic comparative study of WTO and EU law relevant for universal service provision, and a timely contribution to the ongoing scholarly and policy debates about the concept and scope of universal service. Universal service is one of the most significant regulatory issues worldwide and it is likely to remain so. The central question dealt with by the author is how the technologically intensive sector of telecommunications services can be regulated in a socially fair way in the light of liberalisation and the immense importance of ICTs in the Information Society. The author investigates whether the legal frameworks of WTO and EU can meet the challenges of the rapid and dramatic technological and social change and formulates relevant policy recommendations. The book is of interest to both scholars and practitioners in several disciplines, such as EU and WTO law, telecommunications law and regulation, political science regarding market regulation and governance as well as European integration and WTO. Olga Batura is affiliated to the Leuphana Law School, University of Lüneburg, Germany, and to the European Humanities University in Vilnius, Lithuania.

Social Regulation Feb 08 2021

The Economic and Social Regulation of Public Utilities Nov 05 2020 Utilities have long been essential for societies, supplying basic services for nations, organizations and households alike. The proper functioning and regulation of utilities is therefore critical for the economy, society and security. History provides an invaluable insight into important issues of the economic and social regulation of utilities and offers guidance for future debates. However, the history of utility regulation - which speaks of changing, diverse and complex experiences around the world - was sidelined or marginalised when economists and policy-makers enthusiastically embraced the question of how to reform the utilities from the 1970s. This book examines in depth the complex regulation and deregulation of energy, communications, transportation and water utilities across Western Europe, the United States, Australia, Brazil, China and India. In each case, attention is drawn to the changing roles of the state, the market and firms in the regulation, organization and delivery of utility services. This book was originally published as a special issue of *Business History*.

Advancing Interpersonal Emotion Regulation and Social Regulation Feb 20 2022 Managing emotions independently contributes to our own emotional intelligence and our ability to manage other people's emotions effectively. The management of others' emotions is a new phenomenon, and its research offers insight into this effective tool. Advancing Interpersonal Emotion Regulation and Social Regulation advances the understanding of how regulators affect other people's emotions and identifies the skills needed to be an effective emotion manager of others' emotion-elicited events. It expands upon existing models of interpersonal emotion regulation and social regulation and offers intervention strategies within the two constructs of interpersonal emotional regulation and social regulation. Covering topics such as emotional competencies, organizational leaders, and social appearance anxiety, this premier reference source is an excellent resource for business leaders, human resource managers, libraries, students and educators of higher education, psychologists, sociologists, researchers, and academicians.

Regulation and Organisations Jul 21 2019 During the 1980s and 1990s, organisations have undergone both regulation and deregulation. This set of papers written by a distinguished selection of international experts examines the nature of regulation, its evolution in particular sectors and its impact on social and economic equality. It draws on social theory concerned with the nature of regulation and order in modern societies as well as providing as a series of detailed analyses of particular forms of regulatory regimes in national and international contexts. The book should be of particular interest to management and business researchers, sociologists and political economists concerned with the process of regulation and its impact on organisations and management.

Environment and Enforcement Nov 24 2019 Most studies of law enforcement deal with police work, and many are concerned with underenforcement of selective enforcement as problems. This book shifts the focus to social and economic regulation and the issue of compliance.

Law, Literature and Social Regulation in Early Medieval England Oct 04 2020 Pre-Conquest English law was among the most sophisticated in early medieval Europe. Composed largely in the vernacular, it played a crucial role in the evolution of early English identity and exercised a formative influence on the development of the Common Law. However, recent scholarship has also revealed the significant influence of these legal documents and ideas on other cultural domains, both modern and pre-modern. This collection explores the richness of pre-Conquest legal writing by looking beyond its traditional codified form. Drawing on methodologies ranging from traditional philology to legal and literary theory, and from a diverse selection of contributors offering a broad spectrum of disciplines, specialities and perspectives, the essays examine the intersection between traditional juridical texts - from law codes and charters to treatises and religious regulation - and a wide range of literary genres, including hagiography and heroic poetry. In doing so, they demonstrate that the boundary that has traditionally separated "law" from other modes of thought and writing is far more

porous than hitherto realized. Overall, the volume yields valuable new insights into the multi-layered and multi-directional relationship of law, literature, and social regulation in pre-Conquest English society.

**Enforcing Corporate Social Responsibility Codes Mar 29 2020** "Corporate social responsibility codes are guidelines that companies voluntarily develop and publish with the objective to show the public their commitment to respect human rights, to improve fundamental workplace standards worldwide and to not pollute the natural environment. These corporate codes have become a crucial element in the regulatory architecture for globally operating companies. By focusing on the characteristics of the codes, their effects on society, and their legal consequences, this book seeks to provide a comprehensive analysis of corporate codes and the law. Enforcing Corporate Social Responsibility Codes develops proposals on the relation between global corporate self-regulation and the national private law systems. It uses methods of comparative law and sociological jurisprudence to argue that national private law can, and in fact should, enforce these codes as genuine legal obligations. The author formulates legal policy recommendations for English and German private law which indicate how the proposed legal enforcement could be practically realised."--Bloomsbury Publishing.

**Regulation and Economic Analysis Jan 07 2021** Regulation and Economic Analysis: A Critique Over Two Centuries argues that long experience with the practice of regulation creates a broad anti-intervention consensus among economists. This consensus is based on comparison of real intervention to real markets rather than an ideological preconception. It is shown that economic theory can support all possible positions on intervention. Much theory is too abstract to support any policy position; many arguments about how intervention might help contain qualifications expressing doubts about whether the potential can be realized; many theories illustrate the drawbacks of intervention. The vast literature on these issues concentrates either on specific cases or polemics that exaggerate both sides of the argument. Regulation and Economic Analysis seeks to show the depth of the discontent, develop interpretations of economic theory that follow from skepticism about statism and provide selected illustrations. The discussion begins with examination of general equilibrium theory and proceeds to discuss market failure with stress on monopoly and particularly what is deemed excessive concern with predatory behavior. International trade issues, transaction costs, property rights, economic theories of government, the role of special institutions such as contracts, the defects of macroeconomic and equity arguments for regulating individual markets, environmental economics and the defects of public land management policies are examined.

**Morality and the Regulation of Social Behavior Mar 21 2022** Morality indicates what is the 'right' and what is the 'wrong' way to behave. It is one of the most popular areas of research in contemporary social psychology, driven in part by recent political-economic crises and the behavioral patterns they exposed. In the past, work on morality tended to highlight individual concerns and moral principles, but more recently researchers have started to address the group context of moral behavior. In *Morality and the Regulation of Social Behavior: Groups as Moral Anchors*, Naomi Ellemers builds on her extensive research experience to draw together a wide range of insights and findings on morality. She offers an essential integrative summary of the social functions of moral phenomena, examines how social groups contribute to moral values, and explains how groups act as 'moral anchors'. Her analysis suggests that intragroup dynamics and the desire to establish a distinct group identity are highly relevant to understanding the implications of morality for the regulation of individual behavior. Yet, this group-level context has not been systematically taken into account in research on morality, nor is it used as a matter of course to inform attempts to influence moral behavior. Building on social identity and self-categorization principles, this unique book explicitly considers social groups as an important source of moral values, and examines how this impacts on individual decision making as well as collective behaviors and relations between groups in society. Throughout the book, Ellemers presents results from her own research to elucidate how social behavior is affected by moral concerns. In doing this, she highlights how such insights advance our understanding of moral behavior and moral judgments for of people who live together in communities and work together in organizations. *Morality and the Regulation of Social Behavior* is essential reading for academics and students in social psychology and related disciplines, and is an invaluable resource for practitioners interested in understanding moral behavior.

**The Regimes of European Integration Dec 26 2019** The Regimes of European Integration shows why international regimes get built or not and whether national governments delegate to the international level. It contains case studies in economic and social regulation in Germany, the UK, and within the European Union.

**Regulation and Development Aug 02 2020** Jean-Jacques Laffont provides the first theoretical analysis of regulation of public services for less developed countries (LDC's). He shows how the debate between price-cap regulation and cost of service regulation is affected by the characteristics of LDCs, develops a new theory of regulation with limited enforcement capabilities, and discusses the delicate issue of access pricing in view of LDC's specificities. Based on organization theory and history, and using empirical tests where possible, Laffont's evaluation of the different ways to organize the regulatory institutions makes a significant contribution to the field.
