Becoming Steve Jobs Jun 13 2021 Vom angry young man zum Ausnahme-Unternehmer Halb Genie, halb Wahnsinniger, Guru, Choleriker und Kontrollfreak - das ist das vorherrschende Bild, das sich die Welt von Steve Jobs gemacht hat. Jobs selbst hat zu seinen Lebzeiten dieses Image gern gepflegt, und seine Biographen sind ihm bereitwillig gefolgt. Vier Jahre nach seinem Tod im Oktober 2011 ist es nun an der Zeit, ein klareres Bild des Apple-Gründers zu zeichnen, ein Bild, das frei ist von Klischees und Vorurteilen. Brent Schlender begleitete Steve Jobs über zwanzig Jahre lang, der engen Freundschaft der beiden verdanken wir tiefe Einblicke in das Leben des Unternehmers und in das Imperium von Apple. Auf Grundlage zahlreicher Gespräche mit Jobs selbst, mit engsten Vertrauten und Weggefährten wie Tim Cook oder auch Bill Gates ist ein ebenso differenziertes wie leidenschaftliches Porträt entstanden, das in seinem Kern der Frage nachgeht, wie aus einem ungestümen jungen Gründer die wichtigste Unternehmerpersönlichkeit unserer Zeit reifen konnte. Die Nähe Schlenders und das Knowhow Tetzels - beide gehören zu den profiliertesten Technikjournalisten und zu den besten Kennern der Silicon-Valley-Szene - machen *Becoming Steve Jobs* zu einer mitreißenden Geschichte der Technologie-Ära und zu einer Biographie, die den Unternehmer nicht zur Ikone erhebt, sondern den Menschen hinter dem Mythos zum Vorschein bringt.

Sie war eigentlich froh über die neue Aufgabe gewesen. Doch hatte sie nicht ahnen können, dass ihr Team so fürchterlich dysfunktional war und die Teammitglieder sie vor eine Herausforderung stellen würden, die sie niemals zuvor so erlebt hatte ... In "Die 5 Dyfunktionen eines Teams" begibt sich Patrick Lencioni in die faszinierende und komplexe Welt von Teams. In seiner Leadership-Fabel folgt der Leser der Geschichte von Kathryn Petersen, die sich mit der ultimativen

[Making Ideas Happen](#) Apr 11 2021 Thomas Edison famously said that genius is 1% inspiration, 99% perspiration. Every day new solutions, revolutionary cures, and artistic breakthroughs are conceived and squandered by smart people. Along with the gift of creativity come the obstacles to making ideas happen: lack of organisation, lack of accountability and a lack of community support. Scott Belsky has interviewed hundreds of the most productive creative people and teams in the world, revealing one common trait: a carefully trained capacity for executing ideas. Implementing your ideas is a skill that can be taught, and Belsky distills the core principles in this book. While many of us obsess about discovering great new ideas, Belsky shows why it is better to develop the capacity to make ideas happen - using old-fashioned passion and perspiration. *Making Ideas Happen* reveals the practical yet counterintuitive techniques of 'serial creatives' - those few who make their visions a reality.

NEW YORK TIMES BESTSELLER | NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Huffington Post • Financial Times • Success • Inc. • Library Journal Creativity, Inc. is a manual for anyone who strives for originality and the first-ever, all-access trip into the nerve center of Pixar Animation—into the meetings, postmortems, and “Braintrust” sessions where some of the most successful films in history are made. It is, at heart, a book about creativity—but it is also, as Pixar co-founder and president Ed Catmull writes, “an expression of the ideas that I believe make the best in us possible.” For nearly twenty years, Pixar has dominated the world of animation, producing such beloved films as the *Toy Story* trilogy, *Monsters, Inc.*, *Finding Nemo*, *The Incredibles*, *Up*, *WALL-E*, and *Inside Out*, which have gone on to set box-office records and garner thirty Academy Awards. The joyousness of the storytelling, the inventive plots, the emotional authenticity: In some ways, Pixar movies are an object lesson in what creativity really is. Here, in this book, Catmull reveals the ideals and techniques that have made Pixar so widely admired—and so profitable. As a young man, Ed Catmull had a dream: to make the first computer-animated movie. He nurtured that dream as a Ph.D. student at the University of Utah, where many computer science pioneers got their start, and then forged a partnership with George Lucas that led, indirectly, to his co-founding Pixar in 1986. Nine years later, *Toy Story* was released, changing animation forever. The essential ingredient in that movie's success—and in the thirteen movies that followed—was the unique environment that Catmull and his colleagues built at Pixar, based on leadership and management philosophies that protect the creative process and defy convention, such as:

- Give a good idea to a mediocre team, and they will screw it up. But give a mediocre idea to a great team, and they will either fix it or come up with something better.
- If you don't strive to uncover what is unseen and understand its nature, you will be ill prepared

Collective Genius Apr 30 2020 Why can some organizations innovate time and again, while most cannot? You might think the key to innovation is attracting exceptional creative talent. Or making the right investments. Or breaking down organizational silos. All of these things may help—but there's only one way to ensure sustained innovation: you need to lead it—and with a special kind of leadership. *Collective Genius* shows you how. Preeminent leadership scholar Linda Hill, along with former Pixar tech wizard Greg Brandeau, MIT researcher Emily Truelove, and *Being the Boss* coauthor Kent Lineback, found among leaders a widely shared, and mistaken, assumption: that a "good" leader in all other respects would also be an effective leader of innovation. The truth is, leading innovation takes a distinctive kind of leadership, one that unleashes and harnesses the "collective genius" of the people in the organization. Using vivid stories of individual leaders at companies like Volkswagen, Google, eBay, and Pfizer, as well as nonprofits and international government agencies, the authors show how successful leaders of innovation don't create a vision and try to make innovation happen themselves. Rather, they create and sustain a culture where innovation is allowed to happen again and again—an environment where people are both willing and able to do the hard work that innovative problem solving requires. *Collective Genius* will not only inspire you; it will give you the concrete, practical guidance you need to build innovation into the fabric of your business.

As a seasoned business leader Jim has brought us a perfect blend of corporate leadership and entrepreneurial spirit." -- Tony Galasso, President and COO of Sanimax Industries. "We are a 105 year old company and never have established core values, a mission statement or defined our purpose. Jim Alampi's The Execution Roadmap(c) made it feasible and paved the way for our company to establish those key items for a company's foundation. We have never felt more passionate about our core values, mission statement and purpose. Thank you, Jim, for making this feasible."-- Jill Duemeland, President, Duemelands Commercial. "Our firm has had a hockey stick growth curve for the past four years and as a result we outgrew a number of the processes and methods that had gotten us to where we are. Jim is helping us change that by introducing us to the strategies that he has spent years proving out as a CEO and advisor in businesses in many industries. Our team consists of some very talented individuals who have now committed to a handful of initiatives we all agree are our top priorities. Our organization has engaged Jim in an ongoing role to keep us on track and help us achieve our objectives."-- Chris Simchick, Principal Partner, SDLC Partners L.P. "I would recommend Jim Alampi to any business owner who plans to stay in business. His practical, logical and systematic approach to running a business is invaluable. Jim has been instrumental in successfully moving us from one stage of growth to another. As a CEO, it's lonely at the top! You need to have a 3rd party, professional person in your corner. I wouldn't go back to running my company without the help of Jim Alampi."-- Crystal Halley, Owner & CEO, RE/MAX 100.

The Startup Community Way Feb 27 2020 The Way Forward for Entrepreneurship Around the World We are in the midst of a startup revolution. The growth and proliferation of innovation-driven startup activity is profound, unprecedented, and global in scope. Today, it is understood that communities of support and knowledge-sharing go along with other resources. The importance of collaboration and a long-term commitment has gained wider acceptance. These principles are adopted in many startup communities throughout the world. And yet, much more work is needed. Startup activity is highly concentrated in large cities. Governments and other actors such as large corporations and universities are not collaborating with each other nor with entrepreneurs as well as they could. Too often, these actors try to control activity or impose their view from the top-down, rather than supporting an environment that is led from the bottom-up. We continue to see a disconnect between an entrepreneurial mindset and that of many actors who wish to engage with and support entrepreneurship. There are structural reasons for this, but we can overcome many of

these obstacles with appropriate focus and sustained practice. No one tells this story better than Brad Feld and Ian Hathaway. The Startup Community Way: Evolving an Entrepreneurial Ecosystem explores what makes startup communities thrive and how to improve collaboration in these rapidly evolving, complex environments. The Startup Community Way is an explanatory guide for startup communities. Rooted in the theory of complex systems, this book establishes the systemic properties of entrepreneurial ecosystems and explains why their complex nature leads people to make predictable mistakes. As complex systems, value creation occurs in startup communities primarily through the interaction of the "parts" - the people, organizations, resources, and conditions involved - not the parts themselves. This continual process of bottom-up interactions unfolds naturally, producing value in novel and unexpected ways. Through these complex, emergent processes, the whole becomes greater and substantially different than what the parts alone could produce. Because of this, participants must take a fundamentally different approach than is common in much of our civic and professional lives. Participants must take a whole-system view, rather than simply trying to optimize their individual part. They must prioritize experimentation and learning over planning and execution. Complex systems are uncertain and unpredictable. They cannot be controlled, only guided and influenced. Each startup community is unique. Replication is enticing but impossible. The race to become "The Next Silicon Valley" is futile - even Silicon Valley couldn't recreate itself. This book: Offers practical advice for entrepreneurs, community builders, government officials, and other stakeholders who want to harness the power of entrepreneurship in their city Describes the core components of startup communities and entrepreneurial ecosystems, as well as an explanation of the differences between these two related, but distinct concepts Advances a new framework for effective startup community building based on the theory of complex systems and insights from systems thinking Includes contributions from leading entrepreneurial voices Is a must-have resource for entrepreneurs, venture capitalists, executives, business and community leaders, economic development authorities, policymakers, university officials, and anyone wishing to understand how startup communities work anywhere in the world

Identity in Animation Mar 30 2020 Identity in Animation: A Journey into Self, Difference, Culture and the Body uncovers the meaning behind some of the most influential characters in the history of animation and questions their unique sense of who they are and how they are formed. Jane Batkin explores how identity politics shape the inner psychology of the character and their exterior motivation, often buoyed along by their questioning of ‘place’ and ‘belonging’ and driven by issues of self, difference, gender and the body. Through this, *Identity in Animation* illustrates and questions the construction of stereotypes as well as unconventional representations within American, European and Eastern animation. It does so with examples such as the strong gender tropes of Japan’s Hayao Miyazaki, the strange relationships created by Australian director Adam Elliot and Nick Park’s depiction of Britishness. In addition, this book discusses Betty Boop’s sexuality and ultimate repression, Warner Bros’ anarchic, self-aware characters and Disney’s fascinating representation of self and society. *Identity in Animation* is an ideal book for students and researchers of animation studies, as well as any media and film studies students taking modules on animation as part of their course.
