A Field Manual for Palliative Care in Humanitarian Crises Mar 31 2020 As humanitarian aid organizations have evolved, there is a growing

recognition that incorporating palliative care into aid efforts is an essential part of providing the best care possible. A Field Manual for Palliative Care in Humanitarian Crises represents the first-ever effort at educating and providing guidance for clinicians not formally trained in palliative care in how to incorporate its principles into their work in crisis situations. Written by a team of international experts, this pocket-sized manual identifies the needs of people affected by natural hazards, political or ethnic conflict, epidemics of life-threatening infections, and other humanitarian crises. Later chapters explore topics including pain management, skin conditions, non-communicable diseases, palliative care emergencies, the law and ethics of end of life care, and more. Concise and highly accessible, this manual is an ideal educational tool pre-deployment or during fieldwork for clinicians involved in planning and providing humanitarian aid, local care providers, and medical trainees.
