Reconstructing American Education Aug 31 2020 One of the leading historians of education in the United States here develops a powerful interpretation of the uses of history in educational reform and of the relations among democracy, education, and the capitalist state. Michael Katz discusses the reshaping of American education from three perspectives. First is the perspective of history: How did American education take shape? The second is that of reform: What can a historian say about recent criticisms and proposals for improvement? The third is that of historiography: What drives the politics of educational history? Katz shows how the reconstruction of America's educational past can be used as a framework for thinking about current reform. Contemporary concepts such as public education, institutional structures such as the multiversity, and modern organizational forms such as bureaucracy all originated as solutions to problems of public policy. The petrification of these historical products—which are neither inevitable nor immutable—has become, Katz maintains, one of the mighty obstacles to change. The book's central questions are as much ethical and political as they are practical. How do we assess the relative importance of efficiency and responsiveness in educational institutions? Whom do we really want institutions to serve? Are we prepared to alter institutions and policies that contradict fundamental political principles? Why have some reform strategies consistently failed? On what models should institutions be based? Should schools and universities be further assimilated to the marketplace and the state? Katz's iconoclastic treatment of these issues, vividly and clearly written, will be of interest to both specialists and general readers. Like his earlier classic, *The Irony of Early School Reform* (1968), this book will set a fresh agenda for debate in the field.

Zwölf Wege ins Archiv Jan 04 2021 In der heutigen Informationsgesellschaft sind wir mehr denn je auf die langfristige Verfügbarkeit von Wissen angewiesen. Dennoch sind praktisch alle digital gespeicherten Informationen und fast alle seit 1840 erstellten Papierdokumente gefährdet. Zugleich gibt es keinen offenen und interdisziplinären Diskurs zu den relevanten Erhaltungsfragen. Ausgehend von diesem Befund beschreibt Christian Keitel zentrale Fragestellungen und Methoden einer künftigen Archivwissenschaft: Versteht man alle auf Erhaltung spezialisierten Einrichtungen als Archive, können Ansätze der klassischen Archivwissenschaft (Archival Science), der taglichen Praxis in den klassischen Gedächtnisinstitutionen (Bibliotheken, Archive, Museen) und in der freien Wirtschaft, des Records Managements, der Digital Curation und der Informatik zusammengeführt und weiterentwickelt werden. Dafür liefert Keitel mit diesem Band wichtige Impulse: In zwölf Kapiteln diskutiert er aktuelle Fragen zu Bewertung, Erschließung, Archivierungsstrategien sowie Nutzung und verortet sie in ihrem historischen Kontext.

The American School Oct 25 2022 This current, comprehensive history of American education is designed to stimulate critical analysis and critical thinking by offering alternative interpretations of each historical period. In his signature straight-forward, concise style, Joel Spring provides a variety of interpretations of American schooling, from conservative to leftist, in order to spark the reader's own critical thinking about history and schools. This tenth edition follows the history of American education from the seventeenth century to the integration into global capitalism of the twenty-first century to the tumultuous current political landscape. In particular, the updates focus on tracing the direct religious links between the colonial Puritans and the current-day Trump administration. Chapters 1 and 2 have been rewritten to take a closer look at religious traditions in American schools, leading up to the educational ideas of the current U.S. Secretary of Education Betsy DeVos. An updated Chapter 15 further links traditional religious fundamentalist ideas and the twentieth century free market arguments of the Chicago school of economists to President Trump's administration and the influence of the Alt-Right.

Education in the School of Dreams Nov 02 2020 In the earliest years of cinema, travelogues were a staple of variety film programs in commercial motion picture theaters. These short films, also known as "scenics," depicted tourist destinations and exotic landscapes otherwise inaccessible to most viewers. Scenics were so popular that they were briefly touted as the future of film. But despite their pervasiveness during the early twentieth century, travelogues have been overlooked by film historians and critics. In *Education in the School of Dreams*, Jennifer Lynn Peterson recovers this lost archive. Through innovative readings of travelogues and other nonfiction films exhibited in the United States between 1907 and 1915, she offers fresh insights into the aesthetic and commercial history of early cinema and provides a new perspective on the intersection of American culture, imperialism, and modernity in the nickelodeon era. Peterson describes the travelogue's characteristic form and style and demonstrates how imperialist ideologies were realized and reshaped through the moving image. She argues that although educational films were intended to legitimate filmgoing for middle-class audiences, travelogues were not simply vehicles for elite ideology. As a form of instructive entertainment, these technological moving landscapes were both formulaic and also wondrous and dreamlike. Considering issues of spectatorship and affect, Peterson argues that scenics produced and disrupted viewers' complacency about their own place in the world.

American Educational Historiography, 1900-1920 May 08 2021 Educational history was a mode of inquiry directed toward the explanation of the present— processes, problems, and institutions— as that present related to the whole educational process. It attempted to explain the present by constructing its past history. Thus did educational historians concentrate on the contemporary public school system, State controlled, state-supervised, tax-supported, and secular. Thus did educational history try to justify that present by investing contemporary theories, practices and forms with a sanction of historical credibility and venerability. -- Provided by publisher.

Place- and Community-Based Education in Schools Jun 28 2020 Place- and community-based education – an approach to teaching and learning that starts with the local – addresses two critical gaps in the experience of many children now growing up in the United States: contact with the natural world and contact with community. It offers a way to extend young people’s attention beyond the classroom to the world as it actually is, and to engage them in the process of devising solutions to the social and environmental problems they will confront as adults. This approach can increase students’ engagement with learning and enhance their academic achievement. Envisioned as a primer and guide for educators and members of the public interested in incorporating the local into schools in their own communities, this book explains the purpose and nature of place- and community-based education and provides multiple examples of its practice. The detailed descriptions of learning experiences set both within and beyond the classroom will help readers begin the process of advocating for or incorporating local content and experiences into their schools.

Deculturalization and the Struggle for Equality: A Brief History of the Education of Dominated Cultures in the United States Mar 06 2021 This text is a concise history of Anglo American racism and school policies affecting dominated groups in the United States. It focuses on the educational, legal, and social construction of race and racism, and on educational practices related to deculturalization, segregation, and the civil rights movement. Spring emphasizes issues of power and control in schools and shows how the dominant Anglo class has stripped away the culture of minority peoples in the U.S. and replaced it with the dominant culture. In the process, he gives voice to the often-overlooked perspectives of African Americans, Asian Americans, Hispanic/Latino Americans, and Native Americans. An understanding of these historical perspectives and how they impact current conditions and policies is critical to teachers’ success or failure in today’s diverse classrooms. Very brief and affordable,

Deculturalization and the Struggle for Equality is an ideal supplement for Introduction/Foundations of Education, Multicultural Education, or any course that seeks to expand student notions of what U.S. education has been and can be.

A New Paradigm for Global School Systems Mar 26 2020 This volume—a major new contribution to Joel Spring’s reportage and analysis of the intersection of global forces and education—offers a new paradigm for global school systems. Education for global economic competition is the prevailing goal of most national school systems. Spring argues that recent international studies by economists, social psychologists, and others on the social factors that support subjective well-being and longevity should serve as a call to arms to change education policy; the current industrial-consumer paradigm is not supportive of either happiness or long life. Building his argument through an original documentation, synthesis, and critique of prevailing global economic goals for schools and research on social conditions that support happiness and long life, Spring:

*develops guidelines for a global core curriculum, methods of instruction, and school organizations; *translates these guidelines into a new paradigm for global school systems based on progressive, human rights, and environmental educational traditions; *contrasts differing ways of seeing and knowing among indigenous, Western, and Confucian-based societies, concluding that global teaching and learning involve a particular form of holistic knowing and seeing; and *proposes a prototype for a global school—an eco-school that functions to protect the biosphere and human rights and to support the happiness and well-being of the school staff, students, and immediate community—and for a global core curriculum based on holistic models for lessons and instruction. The book concludes with Spring’s retelling of Plato’s parable of the cave—in which educators break the chains that bind them to the industrial-consumer paradigm and rethink their commitment to humanity’s welfare.

Der stumme Frühling Sep 24 2022 *Der stumme Frühling* erschien erstmals 1963. Der Titel bezieht sich auf das Märchen von der blühenden Stadt, in der sich eine seltsame, schleichende Seuche ausbreitet. Das spannend geschriebene Sachbuch wirkte bei seinem Erscheinen wie ein Alarmsignal und avancierte rasch zur Bibel der damals entstehenden Ökologie-Bewegung. Zum ersten Mal wurde hier in eindringlichem Appell die Fragwürdigkeit des chemischen Pflanzenschutzes dargelegt. An einer Fülle von Tatsachen machte Rachel Carson seine schädlichen Auswirkungen auf die Natur und die Menschen deutlich. Ihre Warnungen haben seither nichts von ihrer Aktualität verloren.

The American School: From the Puritans to No Child Left Behind Aug 23 2022 This current, comprehensive history of American education is designed to stimulate critical analysis and critical thinking by offering alternative interpretations of each historical period. The point of view taken by this text emphasizes 1) the role of multiculturalism and cultural domination in shaping U.S. schools, 2) the position of the school as one of many institutions that manage the distribution of ideas in society, 3) racism as a central issue in U.S. history and U.S. educational history, and 4) economic issues as an important factor in understanding the evolution of U.S. schools.

Conflict of Interests Jul 22 2022 Providing a critical understanding of the political and social forces shaping educational politics in the United States, this concise text describes and analyzes how policy is made for American schools and its effect on all of our lives and thinking. Joel Spring argues that the politics of Education is driven by a complex interrelationship between politicians, private foundations and think tanks, teachers' unions, special-interest groups, educational politicians, school administrators, boards of education, courts, and the knowledge industry. The text uses many current examples to illustrate conflicts over educational policies.

Invisible Children in the Society and Its Schools Oct 13 2021 The authors in this book use the metaphors of invisibility and visibility to explore the social and school lives of many children and young people in North America whose complexity, strengths, and vulnerabilities are largely unseen in the society and its schools. These "invisible children" are socially devalued in the sense that alleviating the difficult conditions of their lives is not a priority—children who are subjected to derogatory stereotypes, who are educationally neglected in schools that respond inadequately if at all to their needs, and who receive relatively little attention from scholars in the field of education or writers in the popular press. The chapter authors, some of the most passionate and insightful scholars in the field of education today, detail oversights and assaults, visible and invisible, but also affirm the capacity of many of these young people to survive, flourish, and often educate others, despite the painful and even desperate circumstances of their lives. By sharing their voices, providing basic information about them, and offering thoughtful analysis of their social situation, this volume combines education and advocacy in an accessible volume responsive to some of the most pressing issues of our time. Although their research methodologies differ, all of the contributors aim to get the facts straight and to set them in a meaningful context. New in the Third Edition: Chapters retained from the previous edition have been thoroughly revised and updated, and five totally new chapters have been added on the topics of: *young people pushed into the "school-to-prison" pipeline; *the "environmental landscape" of two out-of-school Mexican migrant teens in the rural Midwest; *the perceptions and practices, in and outside schools, that construct African American boys as school failures; *negative portrayals of blackness in the context of understanding the "collateral damage of continued white privilege"; and *working-class pregnant and parenting teens' efforts to create positive identities for themselves. Of interest to a broad range of researchers, students, and practitioners across the field of education, this compelling book is accessible to all readers. It is particularly appropriate as a text for courses that address the social context of education, cultural and political change, and public policy, including social

foundations of education, sociology of education, multicultural education, curriculum studies, and educational policy.

Spring offers an alternative agenda for American schools, including a proposed education amendment to the U.S. Constitution and replacing human capital agendas with goals emphasizing education for a long life and happiness.
