Comparative Science Aug 22 2019 Examining various social science phenomena and comparative studies fields allows for a holistic approach to understanding rather than trying to achieve understanding as a conglomeration of isolated phenomena.

The Law of Happiness May 31 2020 Since the beginning of time, people have searched for happiness and have amassed many and varied opinions on how it is found. Only recently has empirical science devoted extensive research to questions such as: Is happiness within our control? What role does God play in making people happy? How do I close the gap between where I want? Drawing from the latest scientific and psychological research on the quest for happiness, *The Law of Happiness* reveals that the spiritual truths of the Bible hold the secrets to the happiness we desire. As Dr Henry Cloud unpacks these universal, eternal principles, he reveals that true happiness is not about circumstances, physical health, financial success, or even about the people in our lives. In other words, it's not about the factors that are frequently beyond our control. Rather, happiness is found in choosing to become the kind of people God created us to be. With chapter titles like 'Happy People Connect', 'Happy People Are Envy-Free' and 'Happy People Forgive', Dr Cloud shows just how happiness is achieved as he sets readers on a pathway of spiritual transformation that connects them with the God of the universe. With these new tools, readers will discover that their relationships, their careers and their inner selves are infused with the joy they've been seeking.

The Carbon Footprint Handbook May 11 2021 Thorough and detailed, *The Carbon Footprint Handbook* encompasses all areas of carbon footprint, including the scientific elements, methodological and technological aspects, standards, industrial case studies, and communication of carbon footprint results. Written and edited by an international group of experts, the far-ranging topics on carbon footprinting are divided into three sections comprising chapters focused on methodology, modeling, and case studies. The concepts of carbon footprint and climate change are no longer new to the world. As a result, there is increasing interest in quantifying and reducing the carbon footprint around the world, from industrial to individual levels. This book describes modeling aspects and calculations of carbon footprint in organizations and production. It emphasizes the importance of locating non-polluting energy sources as well as sustainability. The book also provides case studies offering a wealth of information on practices and methods in detecting and addressing carbon footprint. *The Carbon Footprint Handbook* is an important reference that discusses, in depth, the essential details of carbon footprint assessment. It uses research and case studies on methods and practices from locations around the world including China, India, Spain, and Latin America. It demonstrates that the problems of carbon footprint are indeed worldwide while showing how they can be addressed in myriad areas of life, from industrial to personal action.

Treatment and Disposal of Solid and Hazardous Wastes Dec 18 2021 Interest in solid and hazardous waste management is relatively recent, i.e., in the last three decades, and is driven by regulations in most countries. It began with industrial hazardous waste followed by municipal solid waste, and subsequently by many other categories of waste. This book presents numerous examples and case studies of innovative tools, treatment methods and applications in this growing area of research and development. It describes in detail laboratory methods of measuring the biodegradation of specific organic fractions, like floral waste, and also discusses the treatment of yard and food waste by anaerobic digestion and landfill leachate using constructed wetlands. Case studies are provided that show how remote sensing (RS) and GIS were used to develop an integrated solid waste management plan for a city and to evaluate the environmental impacts of stone quarrying activities. The book also features chapters discussing the implications of natural radioactivity in beach placers and their impact on groundwater and other parts of the environment, as well as the twelve principles of green chemistry and their application in the reuse and recycling of solid waste. Moreover, it includes examples of waste to energy, like refuse derived fuel and biofuel generation and an evaluation of their potential, and covers topics such as life cycle assessment as a tool for developing integrated solid waste management systems and an overview of municipal solid waste management rules, illustrating the importance of technological inputs in the development of regulatory frameworks. Written by leading practitioners and scholars in the field, the book enables readers to understand and apply these principles and practices in their endeavours.

The Routledge Guide to British Political Archives Sep 03 2020 This major new reference work provides an authoritative and wide-ranging guide to archive sources now becoming available for British political history since 1945. With a user-friendly layout, the book presents a comprehensive range of 1,500 personal papers from leading statesmen, backbench politicians, writers, campaigners, diplomats and generals which cover the key aspects of British history since the end of the Second World War. Compiled by an experienced archivist, this comprehensive, easy-to-use and authoritative guide is an invaluable resource for researchers of modern British history.

WASTES – Solutions, Treatments and Opportunities II Apr 29 2020 *Wastes: Solutions, Treatments and Opportunities II* contains selected papers presented at the 4th edition of the International Conference Wastes: Solutions, Treatments and Opportunities, that took place 25-26 September 2017 at the Faculty of Engineering of the University of Porto, Porto, Portugal. The Wastes conference, which takes place biennially, is a prime forum for academics and industry representatives from the waste management and recycling sectors around the world to share their experience and knowledge with all in attendance. The published papers focus on a wide range of topics, including: Wastes as construction materials, Wastes as fuels, Waste treatment technologies, MSW management, Recycling of wastes and materials recovery, Wastes from new materials (nanomaterials, electronics, composites, etc.), Environmental, economic and social aspects in waste management and Circular economy.

Modeling and Simulation of Carbon Emission Related Issues Apr 10 2021 Carbon emissions reached an all-time high in 2018, when global carbon dioxide emissions from burning fossil fuels increased by about 2.7%, after a 1.6% increase in 2017. Thus, we need to pay special attention to carbon emissions and work out possible solutions if we still want to meet the targets of the Paris climate agreement. This Special Issue collects 16 carbon emissions-related papers (including 5 that are carbon tax-related) and 4 energy-related papers using various methods or models, such as the input-output model, decoupling analysis, life cycle impact analysis (LCIA), relational analysis model, generalized Divisia index model (GDFM), forecasting model, three-indicator allocation model, mathematical programming, real options model, multiple linear regression, etc. The research studies come from China, Taiwan, Brazil, Thailand, and United States. These researches involved various industries such as agricultural industry, transportation industry, power industry, tire industry, textile industry, wave energy industry, natural gas industry, and petroleum industry. Although this Special Issue does not fully solve our concerns, it still provides abundant material for implementing energy conservation and carbon emissions reduction. However, there are still many issues regarding the problems caused by global warming that require research.

Integrating Sustainable Development in International Investment Law Nov 24 2019 The current international investment law system is insufficiently compatible with sustainable development. To better address sustainable development concerns associated with transnational investment activities, international investment agreements should be made more compatible with sustainable development. *Integrating Sustainable Development in International Investment Law* presents an important systematic study of the issue of sustainable development in the international investment law system, using conceptual, normative and governance perspectives to explore the challenges and possible solutions for making international investment law more compatible with sustainable development. Chi suggests that to effectively address the sustainable development concerns associated with transnational investment activities, the international investment agreements system should be reformed. Such reform should feature redesigning the provisions of the agreements, improving the structure of international investment agreements, strengthening the function of soft law, engaging non-state actors and enhancing the dispute settlement mechanism. The book is primarily aimed at national and international treaty and policy-makers, lawyers and scholars. It is also suitable for graduate students studying international law and policy-making.

Critical Issues in South African Education Oct 04 2020 The main thesis of this book is that, given that South African education faces major challenges, the BRICS (Brazil, Russia, India, China and South Africa) constellation of states offers — thus far overlooked — a valuable tertium comparationis, a source of international comparative perspectives, to inform the domestic scholarly discourse on education. This book first investigates the national contexts and development of education in the BRICS countries, arguing that this grouping represents a valuable but yet overlooked field for illuminating South African education issues with international perspectives. The book consists of chapters arguing for and illustrating this thesis from a variety of angles. Common to all chapters is that authors used the comparative method in education, that is comparing

the national education system, in their education societal context interrelationships, of the BRICS countries. The chapters focus on a number of critical issues in South African education, including the language of learning and teaching issue, the alignment of the world of education with the world of work, early childhood education, and the development of world-class universities. Regarding the last, for example, China has been the terrain of the most intensive national projects of establishing world-class universities, with Project 985, Project 211, and the “Double First Class University” project. The chapters demonstrate what South Africa, in approaching her education issues, can learn from the experience of the BRICS countries.

Project Management – The Complete Process Mar 29 2020 This textbook covers the entire gamut of project scoping, identification, development and appraisal and is primarily designed to meet the requirements of postgraduate students of management and engineering education. Researchers, consultants, policy makers and professionals in project management will find it a good body of knowledge as a reference source. The objective of the book is to provide a multidisciplinary grounding to the readers so that they can develop all the skills and competencies required to view or manage the entire project management process as an integrated whole. The book has been written in an easy-to-understand style and uses live case studies of renewable energy projects to illustrate the concepts, so that the students/readers understand them in the context of the real world. Though based on renewable energy projects, majority of the concepts explained in the book are applicable to other industrial projects equally – detailed guidance and notes on this aspect is given appropriately in the book.

Design: Paper Feb 08 2021 Design: Paper is the first in a new, informative series of design documentaries which offers the best of design in practice. You'll find a curated collection of approximately 300 exquisite designs, along with detailed essays from designers in the field surrounding the essence of creating designs using paper as the medium. This inspiring book also offers personal and professional insight from the authors—mini-workshops that dissect several projects featured in the book relating to materials, craft, and construction.

Evaluation of PEPFAR Aug 02 2020 The U.S. government supports programs to combat global HIV/AIDS through an initiative that is known as the President's Emergency Plan for AIDS Relief (PEPFAR). This initiative was originally authorized in the U.S. Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003 and focused on an emergency response to the HIV/AIDS pandemic to deliver lifesaving care and treatment in low- and middle-income countries (LMICs) with the highest burdens of disease. It was subsequently reauthorized in the Tom Lantos and Henry J. Hyde U.S. Global Leadership Against HIV/AIDS, Tuberculosis, and Malaria Reauthorization Act of 2008 (the Lantos-Hyde Act). Evaluation of PEPFAR makes recommendations for improving the U.S. government's bilateral programs as part of the U.S. response to global HIV/AIDS. The overall aim of this evaluation is a forward-looking approach to track and anticipate the evolution of the U.S. response to global HIV to be positioned to inform the ability of the U.S. government to address key issues under consideration at the time of the report release.

20 Years Chapterwise Topicwise (2021-2002) JEE Main Solved Papers Physics Jul 25 2022

Off the Beaten Path Dec 26 2019 In this book, the academic colleagues of Prof. Dr. Gie Vleugels, who turned 65 in 2021, celebrate his life by contributing chapters in his honor. Several chapters are innovative in nature, including Clemens Wassermann's comparative analysis of 1 John and the Fourth Gospel, which utilizes insights from Semitic syntax and shows how spoken Semitic dialects help us to unearth new perspectives on the relationship between John's Gospel and 1 John. The chapter on the Didache by Martin Webber makes innovative use of Social Identity Complexity Theory. Other contributions come from the fields of New Testament, Old Testament, Historical Theology, and Systematic Theology. Prof. Dr. Dr. Jacobus Kok is Professor and Department Chair of New Testament Studies and Co-Director of RCEC at the Evangelische Theologische Faculteit, Leuven in Belgium, as well as Professor Extraordinarius and NRF B3 rated scholar in the Department of New Testament and Related Literature, Faculty of Theology and Religion, University of Pretoria in South Africa.

ICTR 2021 4th International Conference on Tourism Research Mar 21 2022 Conference Proceedings of 4th International Conference on Tourism Research

Project Management and Engineering Sep 22 2019 Project Management and Engineering is an emergent area. Projects have a tendency to grow in size, involve more stakeholders, and be of greater environmental, organizational and technological complexity. They must also fulfil continuously increasing requirements. This causes greater demands on the effectiveness of Project Engineering and the efficiency of Project Management. This volume brings together a collection of recent work by researchers and professionals in the fields of project management and design in civil engineering, environmental engineering, energy efficiency, rural development, production and process engineering, industrial design and information technology and communication.

CARS 2002 Computer Assisted Radiology and Surgery Jun 19 2019 Progress in specific computer-assisted techniques (digital imaging, computer-aided diagnosis, image-guided surgery, MEMS, etc.) combined with computer-assisted integration tools offers a valuable complement to or replacement for existing procedures in healthcare. Physicians are now employing PACS and telemedicine systems as enabling infrastructures to improve quality of and access to healthcare. Tools based on CAD and CAS facilitate completely new paths in patient care. To ensure that CARS tools benefit the patient, collaboration between various disciplines, specifically radiology, surgery, engineering, informatics, and healthcare management, is a critical factor. A multidisciplinary congress like CARS is a step in the desired direction of knowledge sharing and crossover education. It provides the necessary cooperative framework for advancing the development and application of modern computer-assisted technologies in healthcare.

ICTR 2018 International Conference on Tourism Research Nov 17 2021 These proceedings represent the work of researchers participating in the International Conference on Tourism Research (ICTR 2018) which is being hosted by JAMK University of Applied Sciences, Jyväskylä, Finland on 23-24 March 2018.

Scientific Papers Dec 06 2020 Beginning with v. 12, its Abstracts, v. 1-16, from its Bulletin, v. 7-22, were issued with the Scientific papers.

Adults, Mathematics and Work Sep 15 2021 Adults, Mathematics and Work explains mathematics invisibility and how it can be overcome to enable further development. It also offers a systematic way of recognising informal and non-formal learning in the workplace which is highly valued as experience by employers.

The Routledge Handbook of Census Resources, Methods and Applications Mar 09 2021 The collection of reliable and comprehensive data on the magnitude, composition and distribution of a country's population is essential in order for governments to provide services, administer effectively and guide a country's development. The primary source of basic demographic statistics is frequently a population census, which provides hugely important data sets for policy makers, practitioners and researchers working in a wide range of different socio-demographic contexts. The Routledge Handbook of Census Resources, Methods and Applications provides a comprehensive and authoritative guide to the collection, processing, quality assessment and delivery of the different data products that constitute the results of the population censuses conducted across the United Kingdom in 2011. It provides those interested in using census data with an introduction to the collection, processing and quality assessment of the 2011 Census, together with guidance on the various types of data resources that are available and how they can be accessed. It demonstrates how new methods and technologies, such as interactive infographics and web-based mapping, are now being used to visualise census data in new and exciting ways. Perhaps most importantly, it presents a collection of applications of census data in different social and health science research contexts that reveal key messages about the characteristics of the UK population and the ways in which society is changing. The operation of the 2011 Census and the use of its results are set in the context of census-taking around the world and its historical development in the UK over the last 200 years. The results of the UK 2011 Census are a unique and reliable source of detailed information that are immensely important for users from a wide range of public and private sector organisations, as well as those working in Population Studies, Human Geography, Migration Studies and the Social Sciences more generally.

The Routledge Companion to Human Resource Development Feb 20 2022 The field of Human Resource Development (HRD) has grown in prominence as an independent discipline from its roots in both management and education since the 1980s. There has been continual debate about the boundaries of HRD ever since. Drawing on a wide and respected international contributor base and with a focus on international markets, this book provides a thematic overview of current knowledge in HRD across the globe. The text is separated into nine sections which explore the origins of the field, adjacent and related fields, theoretical approaches, policy perspectives, interventions, core issues and concerns, HRD as a profession, HRD around the world, and emerging topics and future trends. An epilogue rounds off the volume by considering the present and future states of the discipline, and suggesting areas for further research. The Routledge Companion to Human Resource Development is an essential resource for researchers, students and HRD professionals alike.

29 Online JEE-Main Year Wise Solved Papers (2019-2012) with Solution and Detailed Analysis Aug 26 2022 Salient features of the book are: 1. 2610 MCQs 2. Authentic Papers 3. Errorless Solutions 4. Trend Analysis of 2019, 2018 & 2017 Online Papers 5. Relevant & high-quality Test Papers prepared by highly experienced faculty members 6. Detailed solution of each paper for self-evaluation so that you can focus on your weak areas to improve 7. Help student to plan question paper attempt strategy for maximum output 8. Increases speed & accuracy and builds confidence to face JEE Main competitive examination 9. Develops sound examination temperament in students to face the competitive examination with a supreme state of confidence and ensures success 10. The student is advised to take these papers in the prescribed time limit by creating an exam like environment at home 11. We firmly believe that the book in this form will definitely help a genuine, hardworking student 12. We have put our best efforts to make

The Law of Happiness Jul 01 2020 Using new scientific research and ancient biblical truths, reveals how to close the happiness gap and attain personal joy.

Regions and Economic Resilience Aug 14 2021 The term “resilience” originated in environmental studies and describes one's biological capacity to adapt and thrive under adverse environmental conditions. Regional economic resilience is defined as the capacity of a territory's economy to resist and/or recover quickly from external shocks, often even improving on its prior situation (before the shock). The contributions in this book analyse different channels related to processes of mitigation (resistance–recovery) and adaptive resilience (reorientation–renewal), in a wide variety of geographical settings and scales. While the different chapters include relevant methodological advances in this literature, they also obtain relevant results from a policy perspective. Moreover, the wide spectrum of topics and analyses among the contributions in this book extend the current framework, to analyse regional economic resilience, from the intersection of several disciplines involving geographers, economists and demographers, as well as environmental scientists.

100 Years of NCVO and Voluntary Action Jul 13 2021 This book explores the rich history of voluntary action in the United Kingdom over the past 100 years, through the lens of the National Council for Voluntary Organisations (NCVO), which celebrates its centenary in 2019. From its establishment at the end of the First World War, through the creation of the Welfare State in the middle of the twentieth century, to New Labour and the Big Society at the beginning of this century, NCVO has been at the forefront of major developments within society and the voluntary movement. The book examines its many successes, including its role in establishing high-profile charities such as Age Concern, the Youth Hostels Association, and National Association of Citizens' Advice Bureaux. It charts the development of closer relations with the state, resulting in

growing awareness of the value of voluntary action, increased funding, and beneficial changes to public policy, tax and charity law. But it also explores the criticisms NCVO has faced, in particular that by pursuing a partnership agenda and championing professionalisation, it has contributed to an erosion of the movement's independence and distinctiveness.

Information Engineering and Applications Oct 24 2019 In past twenty years or so, information technology has influenced and changed every aspect of our lives and our cultures. Without various IT-based applications, we would find it difficult to keep information stored securely, to process information and business efficiently, and to communicate information conveniently. In the future world, ITs and information engineering will play a very important role in convergence of computing, communication, business and all other computational sciences and application and it also will influence the future world's various areas, including science, engineering, industry, business, law, politics, culture and medicine. The International Conference on Information Engineering and Applications (IEA) 2011 is intended to foster the dissemination of state-of-the-art research in information and business areas, including their models, services, and novel applications associated with their utilization. International Conference on Information Engineering and Applications (IEA) 2011 is organized by Chongqing Normal University, Chongqing University, Shanghai Jiao Tong University, Nanyang Technological University, University of Michigan and the Chongqing University of Arts and Sciences, and is sponsored by National Natural Science Foundation of China (NSFC). The objective of IEA 2011 is to will provide a forum for engineers and scientists in academia, industry, and government to address the most innovative research and development . Information Engineering and Applications provides a summary of this conference including contributions for key speakers on subjects such as technical challenges, social and economic issues, and ideas, results and current work on all aspects of advanced information and business intelligence.

Reversible Computation Jun 24 2022 This book constitutes the refereed proceedings of the 4th International Workshop on Reversible Computation, RC 2012, held in Copenhagen, Denmark, in July 2012. The 19 contributions presented in this volume were carefully reviewed and selected from 46 submissions. The papers cover theoretical considerations, reversible software and reversible hardware, and physical realizations and applications in quantum computing.

2019-2021 JEE Main Online Solved Papers Physics (All 58 Sets with detailed Solution) Apr 22 2022 1. JEE Main Online Solved Papers is a complete practice package of JEE Mains 2. This book includes 58 question papers of JEE Main Online papers 3. Solved Papers from 2019 -2021 are given for practice 4. Student friendly solutions are given for each question for the quick revision of concepts "Practice makes a man perfect," is utmost relevant phrase that fits exactly on the JEE Main aspirants. Devoting most of the time on solving previous years Solved papers are highly stressed by various coaching experts as they help students in better preparation by giving them an opportunity to revise the syllabus well before the actual JEE Main Exam. Introducing, the all-new edition of 'JEE Main Online Solved Papers – Physics' that is aimed to meet the needs of the JEE aspirants for an essential step in their preparation. Serving as a key to the right preparation, this book gathers all 58 Sets of Online papers from 2019 to 2021. Each attempted month has a bunch of question papers that are categorized under 2 shifts. The Question Papers of every month is structured in such a way that tests the aptitude, analytical, logical, and reasoning skills of the aspirants. At the end of each month, Solutions are provided with well-detailed & authentic answers for better understanding. **TOC** JEE Main Online Solved Papers 2021 – February Attempt, March Attempt, July Attempt, August & September Attempt, JEE Main Online Solved Papers 2020 – January Attempt, September Attempt, JEE Main Online Solved Papers 2019 – January Attempt, September Attempt.

OECD Territorial Reviews: Puebla-Tlaxcala, Mexico 2013 Nov 05 2020 A comprehensive economic review of the Puebla-Tlaxcala region of Mexico. The review examines the region's challenges and assets and makes a series of policy recommendations.

Journal of the Fortean Research Center Paperbound Jan 07 2021 The Fortean Research Center was founded in Lincoln, Nebraska in 1982. During the two decades of its existence, this volunteer group of researchers and investigators delved deep into the unexplained. Exploring events in Nebraska - and far beyond -that included ghosts, UFOs, Bigfoot encounters, animal mutilations, government cover-ups, alleged alien abductions, psychic phenomena, cult activity, and even a sighting of a blob-like mystery creature the Fortean Research Center became recognized among members of the Fortean, paranormal, and UFO research communities around the world, as a reliable and trusted source of information. Here is the entire collection of the Journal of the Fortean Research Center, 23 issues in all. These publications are a reflection of their time, and demonstrate in many cases the beginning steps into subjects familiar to the public today: alleged UFO crashes and landings at government installations, alien abductions, cryptozoology and more.

How to Work with Sex Offenders Feb 26 2020 How to Work with Sex Offenders is a cutting edge, state-of-the-art book that provides mental health professionals best practice techniques on how to clinically evaluate, interview, and treat this challenging patient population. Successful models of individual, family, and group models of psychotherapy are provided for the reader. In addition, this handbook walks the reader through the investigation, arrest, prosecution and court hearing process, from start to finish. Thoroughly revised, this new edition builds on additional research data and new information, adding advanced chapters on female offenders, Internet offenders, pornography, sexual addiction, rape and child and adolescent sexual misconduct. This is a must-read work for undergraduate and graduate students, law enforcement officers, prosecutors, judges, child protection service workers, therapists, and other professionals who work with sex offenders.

Problems and Solutions in Human Assessment Jul 21 2019 The assessment of individual differences has generated shockwaves affecting sociology, education, and a number of other behavioral sciences as well as the fields of management and organizational behavior. In covering the assessment of individual differences, this book pays tribute to the interests and activities that Douglas N. Jackson has incorporated into his career as a psychologist. He continues to be a leader in putting academic findings to practical use. He has also inspired generations of students with his mastery of complex concepts and as a personal example of the ability to balance several simultaneous areas of research. Consistent with the focus of Jackson's research, the theme of this book will be how the use of deductive, construct-driven strategies in the assessment of individual differences leads to benefits in terms of the applicability of the assessment instruments and the clarity of the conclusions that can be drawn from the research.

CSIR Publications Jan 27 2020

Geological Survey Water-supply Paper Jan 19 2022

European Journal of Tourism Research Jun 12 2021 The European Journal of Tourism Research is an interdisciplinary scientific journal in the field of tourism, published by Varna University of Management, Bulgaria. Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism. Publications from all fields, connected with tourism such as management, marketing, sociology, psychology, geography, political sciences, mathematics, statistics, anthropology, culture, information technologies and others are invited. The journal is open to all researchers. Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions. Regular Articles in the European Journal of Tourism Research should normally be between 4 000 and 20 000 words. Major research articles of between 10 000 and 20 000 are highly welcome. Longer or shorter papers will also be considered. The journal publishes also Research Notes of 1 500 – 2 000 words. Submitted papers must combine theoretical concepts with practical applications or empirical testing. The European Journal of Tourism Research includes also the following sections: Book Reviews, announcements for Conferences and Seminars, abstracts of successfully defended Doctoral Dissertations in Tourism, case studies of Tourism Best Practices. The European Journal of Tourism Research is published in three Volumes per year. The full text of the European Journal of Tourism Research is available in the following databases: EBSCO Hospitality and Tourism CompleteCABI Leisure, Recreation and TourismProQuest Research Library Individual articles can be rented via journal's page at DeepDyve. The journal is indexed in Scopus and Thomson Reuters' Emerging Sources Citation Index. The editorial team welcomes your submissions to the European Journal of Tourism Research.

Twenty Years of Education Transformation in Gauteng 1994 to 2014 May 23 2022 Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the books chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Educations present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.
