**Advances in Self-Organizing Maps** Mar 31 2020 Self-organizing maps (SOMs) were developed by Teuvo Kohonen in the early eighties. Since then more than 10,000 works have been based on SOMs. SOMs are unsupervised neural networks useful for clustering and visualization purposes. Many SOM applications have been developed in engineering and science, and other fields. This book contains refereed papers presented at the 9th Workshop on Self-Organizing Maps (WSOM 2012) held at the Universidad de Chile, Santiago, Chile, on December 12-14, 2012. The workshop brought together researchers and practitioners in the field of self-organizing systems. Among the book chapters there are excellent examples of the use of SOMs in agriculture, computer science, data visualization, health systems, economics, engineering, social sciences, text and image analysis, and time series analysis. Other chapters present the latest theoretical work on SOMs as well as Learning Vector Quantization (LVQ) methods.

**Developing Country Perspectives on Public Service Delivery** Jun 22 2019

The book examines the status of public service in developing countries, in the sectors of health, infrastructure, labour and marginalized populations, rural economy and public administration. The last decade has witnessed significant government focus on service delivery in developing nations like South Africa, Philippines, India and Malaysia. At the forefront of this movement has been the public sector reforms significantly driven by two broad factors: public sector inefficiencies and liberal economic ideology. This move towards efficient public service delivery in developing nations (versus developed nations) has required a significant shift in institutional thinking and institutional capacity for the governments. It is therefore no surprise that while economic liberalization has been relatively easy to implement, governance reforms towards public service delivery has been significantly more challenging. In this background, the chapters of the book, with sector themes, examine the three basic foundations of public policy—courses of action, regulatory measures and issues, and funding structures and priorities—in public service delivery. The book is a multi country, multi sector, perspective since it includes studies from Russian Federation, India, Ethiopia, Pakistan, Fiji, South Africa, Columbia, Philippines, Macedonia and India. This perspective lends itself to the investigation for a comprehensive overall development model.

Modern Electric, Hybrid Electric, and Fuel Cell Vehicles Aug 29 2022 "This book is an introduction to automotive technology, with specific reference to battery electric, hybrid electric, and fuel cell electric vehicles. It could serve electrical engineers who need to know more about automobiles or automotive engineers who need to know about electrical propulsion systems. For example, this reviewer, who is a specialist in electric machinery, could use this book to better understand the automobiles for which the reviewer is designing electric drive motors. An automotive engineer, on the other hand, might use it to better understand the nature of motors and electric storage systems for application in automobiles, trucks or motorcycles. The early chapters of the book are accessible to technically literate people who need to know something about cars. While the first chapter is historical in nature, the second chapter is a good

introduction to automobiles, including dynamics of propulsion and braking. The third chapter discusses, in some detail, spark ignition and compression ignition (Diesel) engines. The fourth chapter discusses the nature of transmission systems.” —James Kirtley, Massachusetts Institute of Technology, USA “The third edition covers extensive topics in modern electric, hybrid electric, and fuel cell vehicles, in which the profound knowledge, mathematical modeling, simulations, and control are clearly presented. Featured with design of various vehicle drivetrains, as well as a multi-objective optimization software, it is an estimable work to meet the needs of automotive industry.” —Haiyan Henry Zhang, Purdue University, USA “The extensive combined experience of the authors have produced an extensive volume covering a broad range but detailed topics on the principles, design and architectures of Modern Electric, Hybrid Electric, and Fuel Cell Vehicles in a well-structured, clear and concise manner. The volume offers a complete overview of technologies, their selection, integration & control, as well as an interesting Technical Overview of the Toyota Prius. The technical chapters are complemented with example problems and user guides to assist the reader in practical calculations through the use of common scientific computing packages. It will be of interest mainly to research postgraduates working in this field as well as established academic researchers, industrial R&D engineers and allied professionals.” —Christopher Donaghy-Sparg, Durham University, United Kingdom The book deals with the fundamentals, theoretical bases, and design methodologies of conventional internal combustion engine (ICE) vehicles, electric vehicles (EVs), hybrid electric vehicles (HEVs), and fuel cell vehicles (FCVs). The design methodology is described in mathematical terms, step-by-step, and the topics are approached from the overall drive train system, not just individual components. Furthermore, in explaining the design methodology of each drive train, design examples are presented with simulation results. All the chapters have been updated, and two new chapters on Mild Hybrids and Optimal Sizing and Dimensioning and Control are also included • Chapters updated throughout the text. • New homework problems, solutions, and examples. • Includes two new chapters. • Features accompanying MATLAB™ software.

*Les Mbengis - Migration, Gender, and Family* Jul 24 2019 This book is about transnational migration (familiarily called “bushfalling”) and remittance flows to Cameroon. With the current dire economic state, Cameroonians increasingly aspire to go abroad to make a living. Migrants achieve this through a collective (family) strategy and with the help of migration brokers. Relations between migrants and the family that stays in Cameroon can be characterized as follows: Families raise and educate their children to become adults. In return to giving their children the “gift of life”, families expect reciprocity, best secured through economic success abroad and the sending of remittances by migrants.

As families in Cameroon heavily contribute to the funding of migration trajectories, often by selling properties such as land or houses or borrowing money, they also expect a return on their investments. All that constitutes this study explores under the notion of the moral economy of transnational remittances. In this study, remittances are understood to be a composite of financial, material, and cultural flows—maintaining and transforming social and kinship ties. The book proposes also a large exploration of themes in relation to transnational migration: why and how Cameroonians migrate (the role of the operational family in terms of decision and funding; the role of migration brokers through the identification of “lines” and the provision of the necessary papers); the moral justification for migration; the ways social relations and customs are changed by status gained through migration; the ways people explain the failure of migration projects, the difficulties to stay abroad; the matrimonial strategies to go and stay abroad. This is an empirically rich and theoretically sophisticated study that takes thinking on transnational migration informed by African strategies and experiences a step further.

*India-Pakistan Trade Normalisation* Jun 14 2021 This book explores the unfinished India–Pakistan Trade normalisation agenda (building upon the

themes covered in the book “India-Pakistan Trade: Strengthening Economic Relations” published by Springer in 2014) and discusses the steps that must be undertaken in order to move the bilateral engagement forward. Given the commencement of bilateral state-level talks and the Indian government’s emphasis on South Asian integration, it adds impetus to the trade liberalisation process, while also providing essential recommendations for policymakers in both countries. The unfinished agenda faces obstacles such as the list of items for which export from India to Pakistan continues to be restricted; lack of land borders and seamless cross-border transport services, which hampers the realisation of trade potential; negative reporting in the media, which influences traders’ perceptions; and the continued occurrence of informal trade resulting from inadequacies of formal trade relations. The book examines various sectors, including the agricultural, textiles, automotive and pharmaceutical industries, given their predominance on the list of restricted items for bilateral trade. It also covers studies on unconventional and under-researched themes concerning informal trade, informational barriers to India–Pakistan trade, and opening new land borders for trade – all of which can play a facilitating role in realizing the untapped trade potential between India and Pakistan. The book also includes the second round of the India–Pakistan trade perception survey, which identifies impediments to India–Pakistan bilateral trade and assesses the change in traders’ perceptions since the first round of the survey, which was published in 2014.

**Lemon-Aid New Cars and Trucks 2011** Apr 24 2022 As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. **The Routledge Companion to Identity and Consumption** May 02 2020 "Tell me what you eat, I'll tell you who you are," said Anthelme Brillat-Savarin. Today, "You are what you consume" is more apt. Barbara Krueger's ironic twist of Descartes - "I shop therefore I am" - has lost its irony. Such phrases have become commonplace descriptions of our identity in the contemporary world. In our materialistic world it seems as if there is no debate that our consumption behaviour is fused with our self-identity - shaping it, changing it and often challenging it. The Routledge Companion to Identity and Consumption introduces the reader to state-of-the-art research, written by the world's leading scholars regarding the interplay between identity and consumption. The book addresses the diverse issues regarding the ways identity affects our consumption behaviour and vice-versa and in doing so, presents a broad perspective on the dynamics of self-identity and consumption. With chapters discussing the theory, research and practical implications of these dynamics,

including the way they change across our life span and their expression within different social, cultural and religious contexts, this book will be a valuable reference source for students and academics from a variety of disciplines. **Driving Identities** May 26 2022 Driving Identities examines long-standing connections between popular music and the automotive industry and how this relationship has helped to construct and reflect various socio-cultural identities. It also challenges common assumptions regarding the divergences between industry and art, and reveals how music and sound are used to suture the putative divide between human and non-human. This book is a ground-breaking inquiry into the relationship between popular music and automobiles, and into the mutual aesthetic and stylistic influences that have historically left their mark on both industries. Shaped by new historicism and cultural criticism, and by methodologies adapted from gender, LGBTQ+, and African-American studies, it makes an important contribution to understanding the complex and interconnected nature of identity and cultural formation. In its interdisciplinary approach, melding aspects of ethnomusicology, sociology, sound studies, and business studies, it pushes musicological scholarship into a new consideration and awareness of the complexity of identity construction and of influences that inform our musical culture. The volume also provides analyses of the confluences and coactions of popular music and automotive products to highlight the mutual influences on their respective aesthetic and technical evolutions. Driving Identities is aimed at both academics and enthusiasts of automotive culture, popular music, and cultural studies in general. It is accompanied by an extensive online database appendix of car-themed pop recordings and sheet music, searchable by year, artist, and title.
