[The Secret Traditions of the Shinobi](#) Apr 29 2020 The shinobi, or ninja, is one of the most widely recognized figures in the world of espionage—and also one of the most misrepresented. What do we really know about the historical shinobi, his tactics, and his role in medieval Japanese society? In *Secret Traditions of the Shinobi*, these questions—and many more—are answered. Translated into English for the very first time, this widely sought-after collection of historical documents brings to light the secret practices, techniques, philosophies, and lifestyles of the shinobi. Included are: • the Shinobi Hiden, or "Secret Ninja Tradition," a documentation of techniques commonly attributed to one of the best-known ninja masters, Hattori Hanzo; • the Koka Ryu Ninjutsu Densho, a small but important work from the Edo period that reveals the realm of ninja magic and spells; • the three shinobi scrolls of the Gunpo Jiyoshu, a manual enthusiastically promoted by Tokugawa Ieyasu, the first Tokugawa shogun of Japan; • one hundred poems written between the twelfth and fifteenth centuries—making them the oldest collection of written ninjutsu information in the world; and • seventy historical black-and-white illustrations depicting ninja tools and weapons. *Secret Traditions of the Shinobi* will enthral martial artists eager to learn the real skills of the shinobi, as well as anyone interested in this exciting period of Japanese history and espionage. From the Trade Paperback edition.

[School Counselor Consultation](#) Nov 05 2020 Proven practice tools and techniques for effective school consultations Consultation gives school counselors numerous advantages over individual or small group counseling. Chief among them is the far greater amount of children and adolescents one counselor can reach; by creating a more responsive school environment—consisting of teachers, parents, and others who can make decisions that children cannot—the counselor can positively affect all students who pass through that environment. However, making consultation effective requires a high level of knowledge and skill. *School Counselor Consultation: Skills for Working Effectively with Parents, Teachers, and Other School Personnel* represents the most comprehensive resource available for understanding the entire consultation process. Unlike other consultation books that focus on theory, *School Counselor Consultation* emphasizes proven practice techniques. These include: * What to say to parents and teachers about referring students to the school counselor * What to ask teachers to assist in formulating successful interventions * How to make the most of parent conferences * How to plan for, execute, and follow-up on consultation sessions * A five-step approach to conducting an individual consultation * How to plan and present psychoeducational workshops to parents and teachers This hands-on resource also features many forms and checklists—including consultation record forms, a sample agenda, surveys, and a crisis management plan—that you can use in practice. In addition, four appendices cover Adlerian theory, the American School Counselor Association and American Counseling Association Codes of Ethics, and how to best use this book to build consultation skills. Consultation offers one of the most time-effective and beneficial services a school counselor can provide. A valuable resource for both students and practicing counselors, *School Counselor Consultation* is the most complete and up-to-date guide to the challenging yet highly rewarding consultation process.

[The Light and Smith Manual](#) Mar 09 2021 An immensely useful manual with many attractive features: comprehensive and lucid keys, precise diagrams, annotated checklists and up-to-date references. ... there is no doubt that it should be seen as an example of the type of manual which is so badly needed in the study of the fauna of many shores around the world.--*Journal of Animal Ecology* Congratulations to the editors, contributors, and publisher for a job well done. The third edition has been rewritten, corrected, and enlarged, so that while retaining the basic organization of the earlier ones, it is more useful, informative and up-to-date. The meticulous scholarship of Smith and Carlton is just what the revision needed.--*Systematic Zoology* This revision should serve for many years. It is therefore particularly commendable that the editing has been meticulous, perhaps flawless. ... thanks are due to the many contributors for a job well done.--*The Quarterly Review of Biology* As the Pacific Coast intertidal zone undergoes increasingly profound changes, knowing the sentinel invertebrates can foretell the future of the sea, and hence, of our species. Jim Carlton's hefty new update of *The Light & Smith Manual*, the comprehensive compendium of who's who between the tides, is the best and quickest way to do so.--Elliot A. Norse, President, Marine Conservation Biology Institute This much-anticipated modernization of *Light's Manual* is an astonishing accomplishment, blending state-of-the-art taxonomy with profusely illustrated and user-friendly keys to who's whom on marine shores from its stated boundaries of mid-California through Oregon, and clearly, much further north. It's also an informative, well referenced read. Marine biologists should not leave home without it.--Robert Paine, Professor Emeritus of Biology, University of Washington At this time of environmental change and loss of biodiversity, species identification has never been more important. The fourth edition of *Light and Smith* is more than just a field guide--it is a masterwork of research and description with a strong focus on morphological detail. No other book has such a broad scope, newly expanded to include even the most obscure taxa. The revised keys and beautiful anatomical illustrations make this classic guide more indispensable than ever. As taxonomists become extinct, there are fewer students to receive the vast body of knowledge accumulated by generations of careful study. I hope that the beauty and depth of this guide will inspire a generation of young scientists to continue this critical taxonomic work. It will have a place of honor in all marine labs.--Paul K. Dayton, Scripps Institution of Oceanography
