Routledge Handbook of Sports Event Management May 20 2022 From the Olympic Games to community-level competitions, sports events can be complex and pose a particular set of managerial challenges. The Routledge Handbook of Sports Event Management surveys the management of sports events around the world of every size and scale, from small to mega-events, including one-off and recurring events, and single-sport and multi-sport events. The book adopts a unique stakeholder perspective, structured around the groups and individuals who have an interest in and co-create sports events, including organising committees, promoters, sport organisations, spectators, community groups, sponsors, host governments, the media and NGOs. Each chapter addresses a specific stakeholder, defines that stakeholder and its relationships with sports events, describes the managerial requirements for a successful event, assesses current research and directions for future research, and outlines the normative dimensions of stakeholder engagement (such as sustainability and legacy). No other book takes such a broad view of sports event management, surveying key theory, current research, best practice, and moral and ethical considerations in one volume. With contributions from leading sport and event scholars from around the world, the Routledge Handbook of Sports Event Management is essential reading for any advanced student, researcher or professional with an interest in sport management, sport development, sport policy or events.

Japan and the Politics of Techno-globalism Feb 05 2021 "Techno-globalism" is the term used by policymakers to describe the process of opening government and Research and Development programs to foreign participation. This book focuses on Japan's approach to techno-globalism, in particular the policies of the Ministry of International Trade and Industry (MITI). It also explores the politics underlying the approach to this issue in the triad of leading R&D centers - Japan, the United States, and the European Union. The author examines various theoretical approaches to the political economy of globalization, and he describes systems of innovation in Japan, the United States, and the European Union, emphasizing research linkages among firms, national labs, and universities.

Laytime and Demurrage Sep 24 2022 Laytime and Demurrage is an indispensable book for those new to laytime and demurrage as well as anyone who needs a more in-depth analysis. It is considered to be the main source of authority on all issues to do with laytime and demurrage. This book deals with all aspects of laytime, demurrage and detention, tracing the development of the law from its origins in the nineteenth century and earlier, right up to the current day. This updated edition covers all of the judicial and arbitral decisions reported since the last edition published in 2005. It provides an both an overview of the general principles of laytime and demurrage, as well as an in-depth analysis of laytime clauses, including both fixed laytime and customary laytime. It also provides an important detailed analysis of the rules relating to commencement of laytime in berth, dock and port charters, an in-depth coverage of why laytime can be suspended and other laytime matters. The book provides a detailed analysis of demurrage rules, and finally, the book details with such matters as despatch, detention and frustration. This book will be an invaluable guide to practitioners who deal with maritime matters, as well as maritime professionals, commodity traders and brokers, arbitrators and other professionals involved in dispute resolution.

Nanoscience Aug 23 2022 The field of nanoscience continues to grow at an impressive rate, with over 10,000 new articles a year contributing to more than half a million citations. Such a vast landscape of material requires careful examination to uncover the most important discoveries. Nanoscience, edited by Professor Paul O'Brien (University of Manchester) and Dr John Thomas (Bangor University), presents a critical and

comprehensive assessment of the last twelve months of research and discussion. With contributions from around the globe, this series ensures readers will be well-versed in the latest research and methodologies. Chapters cover a range of topics, including 'Mesocrystals', 'Quantum dot synthesis', 'Nano and energy storage' and 'Beyond graphene'. Anyone practicing in a nano-allied field, or wishing to enter the nano-world, will benefit from the publication of this comprehensive resource annually.

Court Confidential Nov 02 2020 Tennis has never before been blessed with such an array of talented stars doing battle for the sport's most coveted titles. Games featuring Murray, Nadal, Federer, Djokovic, the Williams sisters and Maria Sharapova are among the most thrilling matches in the history of the game - and Neil Harman has witnessed them all. He is so close to the beating heart of tennis that he has become a confidant to many of the game's stars and administrators, even at one stage mentoring Victoria Azarenka to help her handle the media pressure at the top of the women's game. In short, Neil enjoys a privileged access that is unmatched elsewhere in the sport. Here he shares tennis's most intimate secrets in a book replete with personality, excitement, drama and intrigue. Featuring frank, in-depth interviews with all the leading players, their coaching staff, their agents and managers, Harman presents the game from an insider's perspective and offers the fresh insights and strong personal views for which he is celebrated. Court Confidential recounts a defining time for modern-day tennis: from Wimbledon to the Olympic Games, from Serena Williams's battle with illness to Andy Murray's historic grand slam victory, this is a book for tennis fans everywhere.
