[Bankrupting the Enemy](#) Mar 08 2021 Award-winning author Edward S. Miller contends in this new work that the United States forced Japan into international bankruptcy to deter its aggression. While researching newly declassified records of the Treasury and Federal Reserve, Miller, a retired chief financial executive of a Fortune 500 resources corporation, uncovered just how much money mattered. Washington experts confidently predicted that the war in China would bankrupt Japan, not knowing that the Japanese government had a huge cache of dollars fraudulently hidden in New York. Once discovered, Japan scrambled to extract the money. But, Miller explains, in July 1941 President Roosevelt invoked a long-forgotten clause of the Trading with the Enemy Act of 1917 to freeze Japan's dollars and forbade it to sell its hoard of gold to the U.S. Treasury, the only open gold market after 1939. Roosevelt's temporary gambit to bring Japan to its senses, not its knees, was thwarted, however, by opportunistic bureaucrats. Dean Acheson, his handpicked administrator, slyly maneuvered to deny Japan the dollars needed to buy oil and other resources for war and for economic survival. Miller's lucid writing and thorough understanding of the complexities of international finance enable readers unfamiliar with financial concepts and terminology to grasp his explanation of the impact of U.S. economic policies on Japan. His review of thirty-seven studies of Japan's resource deficiencies begs the question of why no U.S. agency calculated the impact of the freeze on Japan's overall economy. His analysis of a massive OSS-State Department study of prewar Japan clearly demonstrates that the deprivations facing the Japanese people were the country to remain in financial limbo buttressed its choice of war at Pearl Harbor. Such a well-documented study is certain to be recognized for its significant contributions to the historiography of the origins of the Pacific War.

Kardiovaskuläre Notfall- und Akutmedizin Jun 30 2020 Was ist unmittelbar notfallmäßig zu beachten bei der größten Gruppe von Patienten, die sich täglich selbst oder durch den Rettungsdienst in der Notaufnahme oder in ambulanten Strukturen vorstellen? Dieses Buch fokussiert auf die Primärpräsentation und entwickelt daraus das diagnostische Vorgehen und die weiteren therapeutischen Maßnahmen. Dabei werden Kriterien für die Entscheidung zur Überwachung, ambulanter oder stationärer Weiterbehandlung, diagnostischer Sequenzen und zeitlicher Dringlichkeit einzelner Schritte des Versorgungsprozesses besonders berücksichtigt. Jedes Kapitel wird durch eine Fallvignette eingeleitet, die das jeweils adressierte Krankheitsbild in typischer Ausprägung repräsentiert und auch besondere Herausforderungen in Diagnostik und Therapie aufzeigt. Je nach Thema ergänzt ein diagnostisches Flowchart, eine pathophysiologische Konzeption oder einen notfallmäßigen Ablauf visuell. Take-Home-Botschaften und als Besonderheit eine Box unter dem Stichwort „What to learn next“ z.B. in Form von konkreten Trainings- und Weiterbildungsempfehlungen oder den Hinweis auf Simulationen oder bestimmte verfügbare Fortbildungsformate, schließen das Kapitel ab. Krankheitsbezogene Kapitel werden von Methodik (z.B. nicht-invasive Beatmung), Epidemiologie und Versorgungsforschung ergänzt. Im Bereich kardiovaskulärer Notfallmedizin gibt es z.T. relevante Unterschiede insbesondere in der klinischen Präsentation zwischen Frauen und Männern. Evidenz basierte Unterschiede werden in jedem Kapitel in einer besonderen Infobox „Frauen“ hervorgehoben.
